Screening Examples in Topic Guides:
Consulting as a GP: health promotion within consultation
Gynaecology and Breast: breast and cervical screening
Kidney and Urology: debate around PSA as screening test
Gastroenterology: colorectal cancer screening (including FIT test)
Population Health: NHS Screening and immunisation programmes

Prevention Examples in Topic Guides:
Consulting as a GP: health promotion within consultation
Gynaecology and Breast: breast and cervical screening
Dermatology: HPV vaccination
Sexual Health: HIV prevention
Endocrinology and metabolic problems: obesity
Gastroenterology: dietary advice; liver cancer
Genomics: from lifestyle modification to targeted treatments; Case Study 37 year-old woman with family history of breast cancer asking for advice
Neurodevelopmental disorders, intellectual and social disability: health promotion
Population Health: behaviour change; Case Study 47 year-old woman smoker, high BP and BMI
Respiratory: smoking cessation advice and treatment including e-cigarettes

Detection Examples in Topic Guides:
Children and young people: childhood malignancies (e.g. leukaemias, lymphoma, brain tumours, retinoblastoma, neuroblastoma, nephroblastoma, sarcoma)
Consulting as a GP: recognition of ‘red flags’; ‘safety netting’ to manage and reduce risk; physical examination and investigations
Gynaecology and Breast: Case Study 48 year-old woman with cervical carcinoma
Kidney and Urology: possible indicators of urinary tract malignancy
Ear, Nose, Throat and Mouth: increasing rates of head and neck cancer; access to specialist services
Gastroenterology: sensitive nature of GI symptoms
Genomics: family history of cancer; assessing genetic risk; new DNA technologies
Haematology: thrombocytosis as marker for various cancers
Infectious Disease and Travel Health: diagnostic overshadowing
Mental Health: diagnostic overshadowing
Neurodevelopmental disorders, intellectual and social disability: communication
Respiratory: importance of early diagnosis in lung cancer
Older Adults: non-specific symptoms and signs

Treatment and Management Examples in Topic Guides:
Children and young people: appropriate autonomy and involvement of children, families and carers in care-planning and delivery
Consulting as a GP: skills for reaching shared management decisions
Allergy and Immunology: immunodeficiencies from chemotherapy and biologics, complications of transplantation
Cardiovascular Health: drug-induced heart disease (e.g. secondary to chemotherapy)
Eyes and Vision: sight loss effect on other aspects of care
Gastroenterology: side effects of common medicines
Genomics: follow-up for patients under regular surveillance, targeted treatments for certain conditions (e.g. mastectomy for BRCA1/2 mutation carriers)
Gynaecology and Breast: Case Study 48 year-old woman with cervical carcinoma
Haematology: improving outcomes in treatment of haematological malignancies; ambulatory and shared care management plans; major side effects of chemotherapy including neutropenia; Case Study 79 year-old man with Chronic Lymphocytic Leukaemia
Infectious Disease and Travel Health: infectious disease in the immuno-compromised patient; sepsis and the deteriorating patient
Neurodevelopmental disorders, intellectual and social disability: providing resources and facilities appropriate and tailored to needs.
Children and young people with Chronic Lymphocytic Leukaemia
Neurology: indications for referral of people with neurological emergencies (e.g. spinal cord compression)
Population Health: promoting healthy and preventing disease: role of third sector, voluntary, and NGOs in population health

Recovery & Survivorship Examples in Topic Guides:
People with Long-term conditions including cancer
Gynaecology and Breast: mental and physical consequences of treatment; recurrence; Case study of cervical carcinoma
Haematology: Case Study 79 year-old man with Chronic Lymphocytic Leukaemia
Dermatology: psychosocial impact of skin problems
Haematology: cancer care reviews and follow-up, including safe prescribing, management of multi-morbidity, and recognising signs of disease progression
Mental Health: diagnostic overshadowing, mental and physical co-morbidities, identifying people at risk of depression
Population Health: return to work and rehabilitation, role of third sector, voluntary, and non-governmental organisations
Respiratory: financial compensation for mesothelioma and other occupational lung diseases
Older Adults: Case Study 80 year-old man with back pain and raised PSA

End of Life Examples in Topic Guides:
Children and young people: coordination of care with other primary care professionals
End of Life care: Manage the general medical care of the terminally ill patient, including pain relief; Case Study 32 year-old having palliative care at home
Ear, Nose, Throat and Mouth: Tracheotomy management in primary care
Gastroenterology: Complications and management of stomas
Mental Health: Offer advice and support patients, relatives and carers; bereavement reactions; depression and anxiety in people with long-term physical conditions
Neurology: indications for referral of people with neurological emergencies (e.g. spinal cord compression)
Population Health: promoting healthy and preventing disease: role of third sector, voluntary, and NGOs in population health
