The below words relate to our life-saving work. Can you match the words to their definitions?

1. Prevention
2. Research Nurses
3. Clinical Trials
4. Donations
5. Volunteers
6. Shops

Research in this area can help people reduce their cancer risk and can even stop cancer developing in the first place.

Cancer Research UK has a network of over 600 of these, staffed by committed volunteers.

Without these, Cancer Research UK wouldn’t be able to fund its world leading research.

These healthcare professionals work with patients on clinical trials and help to coordinate those trials.

These studies help researchers and clinicians test new treatments, and their safety and effectiveness.

These amazing people give up their own time to help fundraise, lobby and support the work of Cancer Research UK.

See next page for the answers.
