AT LEAST 15,000 MORE CHILDREN SURVIVED CANCER

AS CHILDREN’S CANCER SURVIVAL MORE THAN DOUBLED SINCE THE 1970S

This is cancer just 3 times in 1,000
- Not able to wee, or, blood in the wee
- An unexplained lump or firmness anywhere on the body

These are cancer just one time in 1,000
- Swollen glands (sides of neck)
- Persistent back pain
- Persistent headaches
- Frequent bruising
- Persistent, unexplained tiredness
- Persistent, unexplained seizures or changes in vision or behaviour

Also see your doctor if you notice any of these
- Persistent abdominal pain or swelling
- Unexplained weight loss or low appetite
- Unexplained swelling
- Changes in appearance of the eyes, or unusual eye reflections in photos
- Frequent vomiting
- Unexplained sweating or fever
- Frequent infections or flu-like symptoms

IT’S USUALLY NOT CANCER, BUT SEE A DOCTOR IF YOUR CHILD HAS ANY OF THESE:

Based on children aged 14 or under surviving cancer for 10 years or more.
