ICBP Clinical Committees

Alan Christie <i>Scotland</i>	Dr Alan Christie MBChB, MSc. is a consultant medical oncologist with a specialist interest in upper GI, HPB and skin cancers, working at the Edinburgh Cancer Centre, UK. He graduated from Aberdeen University, UK, in 2005 and worked as a junior doctor in Aberdeen, New Zealand and Glasgow before completing his specialist training in medical oncology in Edinburgh. He received an MSc in Translational Medicine from the University of Edinburgh in 2015.
Allan Spigelman <i>Australia</i>	Allan Spigelman is Professor of Surgery, UNSW St Vincent's Hospital Clinical School, Sydney, Australia. He is also Director St Vincent's Cancer Genetics Service and the Hunter Family Cancer Service, NSW, Australia. He co-ordinated Australia's first national colorectal cancer survey, was the first Director of Clinical Governance appointed in Australia and is Regional Editor of the International Journal of Health Governance. He was Director of Cancer Services for two Area Health Services. The international staging system for duodenal polyposis in Familial Adenomatous Polyposis, a high cancer risk syndrome (particularly for colorectal cancer) bears his name.
Anant Jani <i>England</i>	Anant Jani, PhD, Honorary Research Fellow. Anant's experience in health care started when working with Sir Muir Gray on the QIPP Right Care programme in the England Department of Health. This involved helping localities across England to design and implement high value population-based healthcare systems, including building the first national system for stroke prevention for patients with Atrial Fibrillation, which was a joint venture with NHS England and Public Health England. Anant is working on the value based healthcare theme within the Nuffield Department of Primary Care Health Sciences and is interested in understanding and implementing value based healthcare. See publications here: https://uk.linkedin.com/pub/anant-jani/4a/545/a38
Andrew Kennedy <i>Ireland</i>	Andrew Kennedy has always had a major interest in laparoscopic and upper GI surgery. These areas include the application of laparoscopic techniques to anti reflux surgery in the treatment of gastro oesophageal reflux disease, the surgical treatment of achalasia, laparoscopic bile duct exploration, laparoscopic management of oesophagogastric cancer, laparoscopic incisional hernia repair and bariatric (obesity) surgery. Andrew is the Irish representative on the council of the Association of Laparoscopic Surgeons. He has also been able to extend his research profile.
Andy Nordin <i>England</i>	Dr Andy Nordin was appointed consultant gynaecological oncologist at the East Kent Gynaecological Oncology Centre in 2000 and took up post as the President of the British Gynaecological Cancer Society in May 2016 and among other responsibilities he was the national clinical lead for gynaecology the Cancer Services Collaborative and NHS Improvement, and served as a clinical lead for England in the International Cancer Benchmarking Partnership. Andy is an active member of the EORTC Quality of Life and Gynecologic Cancer groups, and sits on a number of trial management, trial steering committee and data monitoring committees for national and international trials.
Annika Sjövall <i>Sweden</i>	Annika Sjövall is a colorectal surgeon at Karolinska University Hospital in Stockholm, Sweden. She is focused on colorectal cancer management; by surgery, by projects of improving care pathways, as author of national and regional guidelines and as author of large amounts of patient information. She is chairman of the Stockholm Colorectal Cancer Study group since 2008 and responsible for the launching of the Standardised Care Pathway for patients with colorectal cancer in the Stockholm-Gotland region. She has introduced patient reported experience measures and patient reported outcome measures for all patients who have undergone abdominal resection for colorectal cancer in Stockholm-Gotland since 2013 and in the whole country of Sweden since 2015.
Anur Guhan <i>Scotland</i>	Dr Anur Guhan is a consultant Respiratory Physician in NHS Ayrshire and Arran and a Hon Clinical Senior Lecturer in the University of Glasgow. Dr Guhan is recognised nationally as one of the leaders in chest ultrasound and Pleural Diseases. He was the first in the UK to organise formal training for Respiratory Physicians in Chest Ultrasound skills to ensure patient safety during pleural procedures, won first prize in the NHS Innovation Awards (2012) for Training and Education and has been a finalist in the National Training Awards under the auspices of the UK department of Business, Skills and Innovation. He is currently part of a group developing collaborative research programmes directed at various aspects of COPD and its high prevalence in UK and Irish regions.
Ashley Roberts <i>Wales</i>	Radiologist at Cardiff & Vale University Health Board.
Asif Chaudry <i>England</i>	Mr M Asif Chaudry, Consultant Upper GI/Oesophagogastric Surgeon MA BM BCh Oxford MD FRCS (Gen. Surg.). He is based at The Royal Marsden as a Consultant and has a focused high-volume, minimally invasive and open oesophageal and gastric cancer practice dealing with complex cases. His special interests are: oesophageal and gastric cancer surgery; minimally invasive, laparoscopic and robotic surgery; GIST surgery; diagnostic and therapeutic endoscopy; translational research. He is a founding member of the European Gastric Cancer Association and has an active interest in translational research at the ICR and Biomedical Research Centre
Brian McCaughan <i>Australia</i>	Prof Brian McCaughan is a renowned cardiothoracic surgeon and Chairman of the Clinical Excellence Commission and the Agency for Clinical Innovation. A Clinical Associate Professor at the University of Sydney, Brian has been involved in many management roles at hospital, district, state and commonwealth level. Prof McCaughan was appointed to the New South Wales Health Council and served as the President of the New South Wales Medical Board from 1999 to 2004. He was

ICBP Clinical Committees

	Chair of the Sustainable Access Task Force and also a member of the Health Minister's Advisory Council for New South Wales Health. In 2009 he was awarded Member of the Order of Australia for his services to medicine.
Brian Nicholson <i>England</i>	Brian is a General Practitioner and clinical researcher based at the Nuffield Department of Primary Care Health Sciences at the University of Oxford, UK. His research interests centre around diagnosis and cancer in primary care populations. He has received funding from the NIHR, NIHR School for Primary Care Research, and Cancer Research UK. As the Macmillan GP Facilitator for Oxfordshire he is working on the regions Accelerate Coordinate Evaluate (ACE) wave 2 Multi-Disciplinary Centre (MDC) pilot for non-specific symptoms of cancer. For further information: http://www.phc.ox.ac.uk/team/brian-nicholson
Carys Morgan <i>Wales</i>	Gastrointestinal Consultant at Velindre Cancer Centre.
Christopher Booth <i>Canada</i>	Christopher Booth MD FRCPC is a Medical Oncologist and Health Services Researcher at Queen's University in Kingston, Canada. He is an Associate Professor of Oncology and holds the Canada Research Chair in Population Cancer Care. In his clinical practice he provides care to patients with gastrointestinal and genitourinary cancers. Dr. Booth has an active program in population-based cancer research which is supported by operating grants from the Canadian Institutes of Health Research, Canadian Cancer Society, and Canada Foundation for Innovation. The focus of his research program is to evaluate the effectiveness of new therapies in the general population and the quality of care delivered to patients in routine clinical practice.
Christopher Jackson <i>New Zealand</i>	Dr Jackson is a Consultant Medical Oncologist for the Southern Blood and Cancer Service at Dunedin Hospital. The Otago University-trained Dr Jackson is a Senior Lecturer at the University of Otago and was clinical lead for the recently completed PIPER Project on outcomes for colorectal cancer. He has a leadership role within Cancer Trials New Zealand, and with the University of Otago Centre for Translational Cancer Research. He is the chair of the South Island Bowel Cancer working group, Chair of the Colorectal Cancer Tumour Standards working group, and a member of the National Bowel Cancer Work group.
Christian Finley <i>Canada</i>	Dr. Christian Finley trained in General Surgery at University of British Columbia in Vancouver, BC and thereafter completed his training in Thoracic Surgery at the University of Toronto. He is currently appointed as an Associate Professor in the Department of Surgery, McMaster University. He has an active research program focused on thoracic surgery surgical outcomes and has put considerable effort towards developing the collaborative clinical research program and is the Research Chair for the Canadian Association of Thoracic Surgeons, where he has the opportunity to lead quality improvement projects on a national scale and encourage multi-institutional collaborations.
Cindy Chew <i>Scotland</i>	Dr Cindy Chew MSc (Research), FRCR, MRCS, MB ChB. Consultant Radiologist at Hairmyres University Hospital, Director of Imaging and Anatomy at University of Glasgow. My field of interest is in Gastro-Intestinal and Abdominal Imaging – with particular expertise in Liver, Pancreatic and Lower GI imaging.
Clifford Jones <i>Wales</i>	Dr Clifford Jones, FRCGP (2015), MRCPGP (2008), DRCOG (2007), MB BCH (UWCM, 2003) is a GP in the South Wales Valleys. He has developed a 'Palliative Care Strategy' for Gwent with the NHS and Third Sector, and improving palliative care provision in the Primary Care setting. He has recently taken on the new role of National GP Lead for the Macmillan Framework for Cancer in Primary Care. Dr Jones is also the current chair of the RCGP Wales End of Life Network, and was made a fellow of the Royal College of General Practitioners in June 2015, in recognition of his contribution to end of life care service improvement and education.
David Baldwin <i>England</i>	David Baldwin works as a consultant respiratory physician sub-specialising in lung cancer and mesothelioma and interventional procedures. He is Chair of the Clinical Reference Group for Lung Cancer, NHS England and Lead for the East Midlands Expert Clinical Advisory Group on Lung Cancer and Mesothelioma. He is Honorary Professor in the School of Medicine at the University of Nottingham. His primary research interests are in CT screening and lung cancer epidemiology and is lead respiratory physician on the UK CT lung cancer screening trial (UKLS) and Chair of the Screening Prevention and Early Diagnosis Group. He has been Honorary Secretary of the British Thoracic Society, Clinical Lead on the NICE Lung Cancer Guideline Development Group and Chair of the Quality Standards Group on Lung Cancer.
David Ransom <i>Australia</i>	David Ransom is a Medical Oncologist with 25 years' experience as a clinician. Previously he worked in both public hospital system and in private practice, but more recently he has only worked in the public system. Currently his clinical commitment is at Fiona Stanley Hospital in Perth Western Australia. His practice is focussed on gastrointestinal and neuroendocrine cancers. He has a number of publications in this area. For the last few years he has also been working in the Western Australian Department of Health with a focus on policy and planning for cancer management at a state level. He has a particular interest in equity of access and safety and quality of cancer treatment.
David Weller <i>Scotland</i>	David Weller graduated from the University of Adelaide in 1982, and undertook GP and public health training in the UK and Australia. He moved to Edinburgh in 2000, where he is the James Mackenzie Professor of General Practice and Co-Director of the Centre for Population Health Sciences. He is currently International Dean for

ICBP Clinical Committees

	East/South East Asia and Australasia. His research is mainly in cancer prevention and management, and he leads the Cancer and Primary Care Research International Network (Ca-PRI). David sits on various Scottish and UK cancer advisory boards.
Dearbhaile O’Donnell <i>Ireland</i>	Dearbhaile O’Donnell specialised in medical oncology while pursuing cancer immunology research through a UK Clinician Scientist award. She later became a Senior Lecturer in Medical Oncology in Leeds. She now treats patients with gynaecological and urological cancers in St. James’s Hospital Dublin, and is the Director of the Cancer Clinical Trails Office. She is on the board of directors of the Gynaecological Cancer Intergroup.
Elijah Dixon <i>Canada</i>	Dr. Elijah Dixon attended medical school at the University of Manitoba, did a fellowship in Hepatobiliary/pancreatic surgery and GI transplantation at the Toronto Hospital and did a Masters in Epidemiology at the Harvard School of Public Health. In 2004 he returned to the University of Calgary where he is an Associate Professor of Surgery, Oncology, and Community Health Sciences. His practice is focused on Hepatobiliary and Pancreatic Surgical Oncology. His research is focused on health services research, clinical trials, and improving the quality of cancer surgery.
Erik Jakobsen <i>Denmark</i>	I am a thoracic surgeon working as a chief surgeon and clinical associate professor at Odense University Hospital in Denmark. I am also head of the Danish lung cancer registry since 2000 and have participated in a number of international projects in lung cancer including the first ICBP. I am at the moment also a member of the European Respiratory Society taskforces working with lung cancer benchmarking.
Fiona Walter <i>England</i>	Fiona Walter is Principal Researcher in Primary Care Cancer Research at the University of Cambridge, and a steering group member of Cambridge Cancer Centre’s Early Detection programme. She chairs the Early Diagnosis sub-group of the NCRI’s Primary Care Clinical Studies Group (CSG) and is also a member of the NCRI’s Skin Cancer, and Screening, Prevention and Early Diagnosis (SPED) groups. Fiona is Honorary Clinical Associate Professor at the University of Melbourne, Australia and the University of Western Australia. She continues to practice as a GP, and collaborates with primary care researchers across the UK, Europe and Australia.
Geoff Porter <i>Canada</i>	Geoffrey A. Porter, MD, MSc, FACS, FRCSC is currently a Professor in the Departments of Surgery and Community Health and Epidemiology at Dalhousie University in Halifax, Nova Scotia. He holds the Gibran and Jamie Ramia Chair in Surgical Oncology Research and also serves as Director of the Cancer Outcomes Research Unit at Dalhousie. Dr. Porter is the Expert Lead, Clinical Care at the Canadian Partnership Against Cancer (CPAC), Canada’s national cancer control organization. His research interests are broadly categorized as cancer health services research related with a specific focus on cancer surgery, as well as knowledge translation strategies targeting improved quality of cancer care at a population level.
Georgios (Yoryos) Lyratzopoulos <i>England</i>	Georgios Lyratzopoulos (MD, FFPH, FRCP, MPH) is Cancer Research-UK Advanced Clinician Scientist Fellow (2015-19) and Reader in Cancer Epidemiology at University College London (UCL). As a cancer healthcare and outcomes epidemiologist, his chief current interests are variation in diagnostic intervals and pathways in symptomatic patients with cancer, and variations in cancer treatment and cancer patient experience.
Gunnar Kristensen <i>Norway</i>	I am a senior consultant with board certification in gynaecology and obstetrics (1982). I work full time with gynaecologic oncology at the Norwegian Radium Hospital, where I have worked since as consultant. In recent years I have been working on studies on how to improve the efficacy of treatment for cervical cancer and at the same time reduce the morbidity from the treatment. These efforts have to a great extent been successful as evidenced by the increasing survival figures from our institution. From 1998 to 2013, I was president of the Nordic Society for Gynaecologic Oncology, which is a cooperative group engaged in clinical research.
Hans Thulesius <i>Sweden</i>	Born 1959, work 50% as GP/family physician and 50% research/mentoring/teaching. Associate Prof at Lund University since 2011. Swedish editor of ‘Scand J Prim Health Care’ since 2010. Presently working with a baseline patient record audit protocol for the Swedish standardised cancer pathways project. Beginning in primary care and ending with start of treatment. I also work on comparative data from Swedish and Danish GPs respondents to the ICBP module 3 survey - the Swedish and Danish surveys had space for open ended comments for every item and I am analysing that data hoping to produce a paper.
Iain McNeish <i>Scotland</i>	Iain McNeish became Professor of Gynaecological Oncology at the Institute of Cancer Sciences, University of Glasgow in 2012. He runs a lab that specialises in developing novel biological therapies for ovarian cancer including gene and viral therapies, as well as understanding the fundamental biology of ovarian cancer. Clinically, he is a consultant medical oncologist at the Beatson West of Scotland Cancer Centre. He has been a member of the NCRI Gynaecological Clinical Studies Group since 2006 and chaired the ovarian subgroup from 2009 – 2014. In April 2014, he was appointed Chair of the Gynae CSG. He also represents the UK on the Gynecologic Cancer Intergroup.
Ian Williamson <i>Wales</i>	Dr Ian Williamson is Assistant Medical Director for Cancer Services in Aneurin Bevan University Health Board, South Wales. He is a chest physician with an interest in the diagnosis and management of lung cancer. He has led the lung cancer service within the Heath Board for over 10 years and has chaired the Wales Lung Cancer Group since 2005. He has a particular interest in the early diagnosis and detection of lung cancer and using key clinical indicators and patient outcomes to drive

ICBP Clinical Committees

	improvements in pathway development. He has also worked closely with the Wales Oncology National Specialist Advisory Group to advise Welsh Government on the delivery of cancer services within Wales.
Jason Park <i>Canada</i>	Dr Jason Park is a Surgical Oncologist at St. Boniface General Hospital and CancerCare Manitoba in Winnipeg, Manitoba, Canada. He is also an Associate Professor in the Section of Surgical Oncology at the University Manitoba. His clinical focus includes surgery for complex colorectal cancers, laparoscopic colorectal surgery, and GI endoscopy. He also serves as an Associate Editor for the Canadian Journal of Surgery and Editor of the Oncology Education section for Current Oncology.
Jason Lester <i>Wales</i>	Dr Jason Lester is a Consultant Clinical Oncologist specialising in lung cancer and urological cancers at Velindre Cancer Centre. He is currently Deputy Clinical Director. Dr Lester is a committee member of the British Thoracic Oncology group and member of the National Lung Cancer Consortium. He is the lead investigator in the I-START trial, which is looking at dose escalated radiotherapy in non-small cell lung cancer and the SKOPOS trial, looking at a vaccine in combination with chemotherapy for malignant pleural mesothelioma. Dr Lester is the clinical director of The Stepping Stones Appeal, the Wales-based lung cancer charity.
Jason Tan <i>Australia</i>	Dr Jason Tan's special interest is surgical management of cancer, particularly in radical debulking surgery, and specialises in laparoscopic management of gynaecological cancer. Dr Tan pioneered the robotic surgery for gynaecology and gynaecological oncology in Western Australia with the da Vinci System, and founded WOMEN Centre, a leading multidisciplinary private centre for women's health in Western Australia, in 2014. He is also the current lead clinician for gynaecology and gynaecological oncology for the Western Australia Cancer and Palliative Care Network and a clinical senior lecturer at University of Notre Dame and University of Western Australia.
John Butler <i>England</i>	John Butler is a gynaecological surgeon. He is certified as both a specialist gynaecologist and sub-specialist gynaecological oncology by the RCOG. He is the lead clinician to the International Cancer Benchmarking Partnership, a member of the NCIN clinical reference group, and the Cancer Research UK Early diagnosis committee. His main interests include ultra-radical gynaecological cancer surgery, fertility preserving surgery for cervical cancer, minimal access surgery, risk reducing surgery for BRCA, and vulvar cancer.
John Maclay <i>Scotland</i>	Consultant Physician, Respiratory Medicine, Greater Glasgow and Clyde
John Reynolds <i>Ireland</i>	Professor Reynolds is Professor of Clinical Surgery at the St. James's Hospital and Trinity College Dublin. He is the National Lead for oesophageal and gastric cancer. He is Cancer Lead at St. James's Hospital and the Trinity School of Medicine, and a Principal Investigator in the Trinity Translational Medicine Institute. His clinical interest is in diseases of the oesophagus and stomach. His research interest is in four areas: (1) pathogenesis of Barrett's oesophagus and progression; (2) prediction of response and resistance to chemotherapy and radiation therapy; (3) obesity, altered metabolism, and cancer; (4) malnutrition and peri-operative nutrition.
John Srigley <i>Canada</i>	Dr. John Srigley has practiced surgical and urological pathology for over 30 years and is currently the Chief and Medical Director of the Program of Laboratory Medicine and Genetics at Trillium Health Partners. Dr. Srigley is a Past President of the International Society of Urological Pathologists (ISUP) and the Ontario Association of Pathologists. His research interests include clinical-pathological and translational studies of urological cancer, population-level quality initiatives in cancer pathology and the role of the pathologist in cancer control. Dr. Srigley is also a founding board member and current President of the International Collaboration on Cancer Reporting (ICCR) and has provided advice on population-level standardized cancer pathology reporting to the College of American Pathologists.
John Windsor <i>New Zealand</i>	Professor John Windsor is a surgeon who holds a personal chair in Surgery at the University of Auckland and is Consultant Surgeon in the HBP/Upper GI Unit at Auckland City Hospital. His surgical interests include laparoscopic surgery, pancreatic disease and gastro-oesophageal disease. He established the Pancreas Research Group that has continued to grow, now being encompassed by the Surgical Research Network.
John Zalberg <i>Australia</i>	Professor John Zalberg was the Director, Division of Cancer Medicine, at the Peter MacCallum Cancer Centre in Melbourne, Australia for 17 years prior to recently taking up the position of Professor of Cancer Research in the School of Public Health and Preventive Medicine at Monash University. He is current Co-Chair of the Cancer Drugs Alliance and Chair of the Australian Clinical Trials Alliance. A past Board Member of the NSW Cancer Institute, past President of the Clinical Oncological Society of Australia. Professor Zalberg's clinical research interests include gastrointestinal cancer and health care outcomes.
Johnny Price <i>Northern Ireland</i>	Consultant Gynaecologist, Belfast Trust.
Jon Emery <i>Australia</i>	Prof Jon Emery is the Herman Professor of Primary Care Cancer Research at the University of Melbourne and Western Health, a new Chair developed within the Victorian Comprehensive Cancer Centre. He is an NHMRC Practitioner Fellow, Director of the Cancer Australia Primary Care Collaborative Cancer Clinical Trials Group

ICBP Clinical Committees

	(PC4), and a Visiting Research Fellow at the University of Cambridge. His research interests are in the role of primary care in cancer prevention, diagnosis and follow-up, and primary care trials of complex interventions.
Jonathan McAleese <i>Northern Ireland</i>	Lung Consultant Clinical Oncologist, Belfast City Hospital
Karl Kölbeck <i>Sweden</i>	Dr Kölbeck graduated from Karolinska Institute in 1975, gaining his MD in 1979 and a PhD in 2003 from the Karolinska Institute. He is specialised in Pulmonary Diseases (1984) and Allergology (1989). He has been a Consultant at Karolinska University Hospital since 1996, and Head of Lung Oncology at Dept of Pulmonary Diseases 1996-2016. At present, he is the process leader for the Lung Cancer at Karolinska. He is also a member of the Swedish Lung Cancer Study Group.
Kate Gower-Thomas <i>Wales</i>	Radiologist, Cwn Taf Health Board. I am a specialist breast radiologist with extensive experience over twenty years in breast imaging techniques, including mammographic breast screening, breast ultrasound and breast biopsy techniques. I also have a large gynaecological practice, specialising in ultrasound, including transvaginal, Gynae MRI etc.
Keith Roberts <i>England</i>	Keith John Roberts. I am a full time NHS surgeon working within one of the largest and most dynamic HPB and liver transplant centres in Europe. My clinical research focusses upon pancreatic fistula, outcomes after pancreatic surgery and performing pancreatoduodenectomy without biliary stents. I'm part of a team led by Prof Paul Moss researching a role for immunology in pancreatic cancer at the University of Birmingham.
Ken O'Neill <i>Scotland</i>	Dr Kenneth O'Neill MB ChB BSc (Hons) MRCGP is a General Practitioner in Glasgow Scotland and has been a Clinical Director and Primary Care Cancer Lead within NHS Greater Glasgow & Clyde since 2006. From January 2016 I have been the Clinical Lead for the West of Scotland Primary Care Cancer Group, developing patient-centred cancer services across the in line with national policy, standards and clinical evidence base, reviewing clinical quality standards and the work of the West of Scotland Primary Care Cancer Network.
Kristoffer Lassen <i>Norway</i>	Consultant surgeon/Professor of surgery at Oslo University Hospital.
Lance Saker <i>England</i>	GP and Clinical Vice Chair at Camden Clinical Commissioning Group.
Louise Hanna <i>Wales</i>	Dr Louise Hanna is a consultant clinical oncologist working in the Velindre Cancer Centre in Cardiff. Dr Hanna graduated from Cambridge and Oxford Universities and worked in England before undertaking her clinical oncology training in Wales. She is also currently appointed within Cardiff University as Local Faculty Lead.
Marcia Hall <i>England</i>	Dr Marcia Hall was appointed as a consultant medical oncologist at Mount Vernon Cancer Centre in 1999. Her main interest is the management of gynaecological malignancies, especially ovarian cancer. Keeping as many clinical trial opportunities open for these patients is an on-going aim. Dr Hall has been an active member of the UK National Cancer Research Institute (NCRI) Ovarian Cancer Study Group since 2010, helping to deliberate and plan the research field for ovarian cancer nationally.
Marianne Grønlie Guren <i>Norway</i>	Marianne Grønlie Guren is a Clinical Oncologist, at the Department of Oncology, Oslo University Hospital, Oslo, Norway. Her main clinical expertise is within gastrointestinal cancer, especially within colorectal and anal cancer. She is head of the Norwegian Gastrointestinal Cancer Group – Colorectal, and of the Reference group for the Norwegian Colorectal Cancer Registry, and participates in the K.G. Jebsen Colorectal Cancer Research Centre. Her research focus is within clinical oncology for colorectal and anal cancer, including clinical trials and translational research.
Mark Robinson <i>Wales</i>	Consultant Radiologist in Aneurin Bevan University Health Board (ABHB). I am a General Radiologist with subspecialty interests in Gastro-intestinal Radiology, Uro Radiology and non-vascular intervention. I have been instrumental in establishing the Radiofrequency ablation service in Wales and regularly perform radiofrequency ablation of renal tumours. I have long been interested in improving outcomes for individuals with cancer and have supported this through the following roles in addition to supporting research in our Health Board. MDT peer review reviewer Urology and Colorectal. Joint Radiology Lead South Wales Cancer Network: Diagnostic Services Advisory Structure. Radiology Lead, All Wales Colorectal Cancer Advisory Group Lead and RGH lead for bowel screening.
Mary Theophilus <i>Australia</i>	Dr Mary Theophilus is a specialist colorectal and general surgeon who is part of the colorectal unit at Royal Perth Hospital and has gained extensive experience in all aspects of colorectal and perianal surgery including performing colonoscopy. She practices at SJG Midland Public and Private Hospitals, where she is Head of the Department of general surgery and surgical specialties. Her special interests include all laparoscopic colorectal surgery, trans-anal minimally invasive surgery, perianal and pilonidal surgery.

ICBP Clinical Committees

Maurice Loughrey <i>Northern Ireland</i>	<p>Dr. Maurice Loughrey MRCP FRCPath MD is a consultant gastrointestinal pathologist in the Royal Victoria Hospital, Belfast, and Honorary Senior Lecturer at Queen's University Belfast. His main expertise is in the pathology of colorectal cancer, precursor polyps and in screening. He is involved in quality assurance of colorectal cancer screening programmes in the UK, regionally and nationally, and is lead author on the Royal College of Pathologists (UK) dataset for reporting colorectal cancer (2014) and on forthcoming UK guidelines for reporting bowel cancer screening pathology (Public Health England). Dr. Loughrey provides pathology support for the Northern Ireland Cancer Registry and oversees a research registry of screen-detected colorectal polyps and cancers.</p>
Michael Eden <i>England</i>	<p>Dr. Eden graduated from the University of London and works as a Consultant Pathologist at Cambridge University Hospitals NHS Trust. He also holds positions at the National Cancer Registration and Analysis Service, England as Clinical Lead and Caldicott Guardian and has been involved in Workstream 1, Module 5 of ICBP. He is interested in the role of genomics and IT in delivering pathology services and has international knowledge of cancer registration, staging and tumour classification.</p>
Michael Fung-Kee-Fung <i>Canada</i>	<p>Dr. Michael Fung-Kee-Fung is Professor at the Departments of Obstetrics/ Gynecology and Surgery and cross-appointed to the Telfer School of Management, University of Ottawa. He is currently Head of Surgical Oncology and Chief of Cancer Transformation and Strategy at the Ottawa Regional Cancer Program and The Ottawa Hospital. He has a passionate interest in systems transformation and the role of collaborative methodologies in health innovation including research. Clinically his research focus lies in novel ovarian cancer therapeutics and clinical trials systems redesign. He co-leads the Canadian Cancer Trials Group (CCTG) in gynecology and is a Director of the International Gynecologic Cancer Intergroup (GCIIG).</p>
Mick Peake <i>England</i>	<p>Professor Michael D Peake MB, ChB, FRCP is the Clinical Lead for Public Health England's National Cancer Registration and Analysis Service, overseeing the clinical understanding and analysis of UK-wide population data. He is an Honorary Consultant and Professor of Respiratory Medicine for the University Hospitals of Leicester. Amongst other roles he is a member of the steering group of the British Thoracic Oncology Group, chair of Mesothelioma UK and a member of the National Advisory Group for Clinical Audit and Enquiries. He has been involved in the development and implementation of national cancer policy since the late 1990s. His major interests are early diagnosis and improving outcomes for cancer patients by proper service configuration, supported by good clinical outcome data.</p>
Nagappan Kumar <i>Wales</i>	<p>My main interest is in diseases of the liver, gallbladder, bile duct and pancreas. This includes both benign conditions and cancer. I trained in London, Ontario, Canada, Birmingham and Kings College London. I set up the first Liver Unit in Wales in 2002. This is now accredited as the Centre of Excellence in Wales and is the only centre offering liver surgical services to the population of South Wales. We have audited our results regularly and the outcomes are excellent and similar to most national and international centres.</p>
Nancy Baxter <i>Canada</i>	<p>Dr. Nancy Baxter is board certified in colon and rectal surgery (2002) and a Fellow of the ASCRS. Currently, she is a practicing colorectal surgeon and the Chief, Division of General Surgery at St. Michael's Hospital. Dr. Baxter holds the position of Provincial GI Endoscopy Lead with Cancer Care Ontario. Dr. Baxter is a Professor in the Department of Surgery and Institute of Health Policy, Management and Evaluation at the University of Toronto and a Senior Scientist in the Cancer Theme Group at the Institute for Clinical Evaluative Sciences (ICES). She is a health services researcher interested in the effectiveness of cancer screening, long-term survivorship of cancer survivors and quality of surgical care.</p>
Natalie Coburn <i>Canada</i>	<p>Dr. Coburn is a surgical oncologist at Sunnybrook's Odette Cancer Center with a clinical practice completely devoted to HPB and upper GI cancers. She has been on staff at the Odette Cancer Centre since 2004, and has served in many leadership roles including head of the division of general surgery (2012–2015) and member of Cancer Care Ontario's Program in Evidence-Based Care (2005–present). Dr. Coburn's research is focused on evaluating and improving the outcomes for patients who have GI tract cancers. She has led several major grants examining patterns of care for treatment of GI cancers within Ontario and the U.S., and has contributed internationally to guideline creation to improve processes of care.</p>
Naureen Starling <i>England</i>	<p>Consultant Medical Oncologist BSc(Hons), MBBS, MRCP, MD(Res). Dr Naureen Starling is a Consultant Medical Oncologist at The Royal Marsden, specialising in the treatment of gastrointestinal (GI) cancers. She is a Senior Lecturer (honorary faculty) within the Division of Clinical Studies at the Institute of Cancer Research. Her research interests in gastrointestinal cancers (oesophageal, gastric, pancreatic, neuroendocrine and colorectal) are focussed on earlier phase clinical trials, novel therapeutics and the delivery of individualised medicine to patients with gastrointestinal cancers. She is the principal investigator on numerous international clinical trials of novel drugs in oesophago-gastric, pancreatic and colorectal cancer.</p>
Neil Merrett <i>Australia</i>	<p>MB.BS.(Hons) 1980 FRACS 1989 Foundation Professor of Surgery, University of Western Sydney since 2009. He is a Specialist Upper GI Surgeon, Director of Surgery and Head Upper GI Surgery for South Western Sydney Local Health District (SWSLHD). His unit is one of the busiest Upper GI Oncology units in Australia and has an extensive interest in the development of databases and protocol driven patient cares and outcomes for malignancy and the development of personalised treatment</p>

ICBP Clinical Committees

	programmes for patients with Upper GI malignancies. He is the Chair of the Working Party developing the recommended diagnostic and treatment algorithms for the treatment of Oesophago-gastric and pancreatic neoplasms as well as the development of patient information resources for patients with these conditions
Neville Hacker <i>Australia</i>	Professor Neville Hacker AM established the Gynaecological Cancer Centre at the Royal Hospital for Women, and is a Conjoint Professor of Gynaecological Oncology at the University of New South Wales. He is a Fellow of the: Royal Australian and New Zealand College of Obstetricians and Gynaecologists, Royal College of Obstetricians and Gynaecologists, American College of Obstetricians and Gynecologists, and American College of Surgeons. He is a Past Chairman of the Oncology Committee of the RACOG (now RANZCOG), a Past Chairman of the Board of Oncology Examiners for the RACOG, Past President of the International Gynecologic Cancer Society, and a Past President of the (International) Society of Pelvic Surgeons.
Nigel Hart <i>Northern Ireland</i>	Dr Nigel Hart is a Clinical Senior Lecturer at the Centre for Public Health, School of Medicine, Dentistry and Biomedical Sciences, Queen's University Belfast.
Odd Terje Brustugun <i>Norway</i>	Odd Terje Brustugun is the leader for Oslo University Hospital's 'Cancer in the respiratory tract' project group. The project involves molecular analysis of biological samples from lung and head & neck cancer patients, and correlating this to histopathological features, response to treatment and clinical outcomes. The main aims are the establishment of prognostic and predictive markers, including markers for radiation therapy response and side effects, and potential targets for new treatment strategies. Furthermore, to focus on the obvious differences among men and women, as this is a field of great interest, with little knowledge today as to what this means and how to utilize this clinically.
Patrick Fielding <i>Wales</i>	Dr Patrick Fielding has played an important role in the expansion of funded indications for PET CT imaging (2009), and works for the PETIC centre and the Department of Clinical Radiology at the University Hospital of Wales. His particular interests include PET CT imaging in lung cancer and oesophageal cancer and he is a member of the multidisciplinary team for lung cancer and lymphoma. He is a member of the UK nuclear medicine specialist advisory committee and is actively involved in a clinical research projects within upper GI malignancies.
Paul Dawkins <i>New Zealand</i>	MB ChB 1993 Brist; MRCP (UK) 1996; CCT (UK) Resp Med and Gen (Int) Med 2006; FRCP 2012; FRACP 2014. Paul is a consultant respiratory physician at Middlemore Hospital where he has responsibility for inpatients in respiratory and general medicine, as well as respiratory and sleep outpatient clinics. He performs bronchoscopies (including linear and radial endobronchial ultrasound). He is clinical lead for lung cancer at Middlemore, chairs the Northern region lung cancer tumour stream, and sits on the national lung cancer working group. He is principal and co-investigator for a number of commercial clinical trials at the hospital in respiratory medicine. He has Fellowship of the Royal College of Physicians of London (FRCP) and the Royal Australasian College of Physicians (FRACP).
Paulose George <i>Wales</i>	I was appointed to the current post in Feb 2004 with the primary aim of developing Gastroenterology services in Wrexham Maelor, a teaching hospital attached to North Wales Clinical School under University of Cardiff. I am the clinical lead for endoscopy at Wrexham Maelor Hospital. I have overseen the expansion of GI service at Wrexham and the major developments include regional upper GI cancer centre, JAG accredited national endoscopy training centre and gastroenterology training programme for specialist registrars. My area of interest is diagnosis and treatment of early malignant and pre-malignant lesions in GI tract and am an accredited screening colonoscopist for National bowel screening programme which has been instrumental in improving the outcome of lower GI cancers in UK in the last decade.
Peter Sykes <i>New Zealand</i>	MB ChB(Brist) DipObst(Otago) FRANZCOG DGO. Peter is an Associate Professor at the University of Otago, Christchurch and has sub-specialty training in gynaecological oncology in Melbourne. His interests include gynaecological oncology and advanced preinvasive disease of the genital tract.
Peter Vedsted <i>Denmark</i>	Peter Vedsted is Professor of Primary Care at The Research Unit for General Practice, and Professor of Innovative Patient Pathways at Silkeborg Diagnostic Centre, Aarhus University, Denmark. He is the director of a research group for cancer diagnosis investigating the pathway from symptom to treatment of cancer. The group investigates cancer awareness, healthcare seeking, and conducts clinical studies on the role of family medicine in cancer diagnosis. The centre has special focus on health services research and the organisation of healthcare and general practice. Peter Vedsted is involved in many of the Danish initiatives to improve cancer diagnosis and patient pathways and is deeply engaged in how general practice can develop and be supported in providing earlier cancer diagnosis.
Piers Gatenby <i>England</i>	Piers Gatenby studied undergraduate medicine at Cambridge University and clinical medicine at Oxford University, where he graduated in 1999. Subsequently, he undertook higher surgical training with an interest in oesophagogastric surgery in North West London including Imperial College NHS Trust and The Royal Marsden NHS Foundation Trust. He worked as clinical advisor to the NHS Medical Director from 2009-2010 and has undertaken a fellowship in oesophagogastric surgery at Flinders Medical Centre, Adelaide, Australia and including a visit to the Cancer Institute Hospital in Tokyo, Japan.

ICBP Clinical Committees

Rachel Hargest <i>Wales</i>	Rachel is a Clinical Senior Lecturer in Colorectal Surgery and a member of the Cardiff China Medical Research Collaborative (CCMRC). My clinical practice is performed mainly at University Hospital of Wales, with day surgery and clinic commitments at Llandough and Velindre hospitals respectively. I run a large, busy colorectal practice with special interests in colorectal and anal cancer, genetic disorders which predispose to colorectal cancer, redo and damage limitation surgery, the “catastrophe abdomen” and intestinal failure and complex proctology including fistulae.
Richard Adams <i>Wales</i>	Richard Adams is Reader and Consultant Clinical Oncologist at Cardiff University and Velindre Cancer Centre. He is the Interim Director of the Wales Cancer Trials Unit. His clinical practice and research is focused on lower gastrointestinal cancers. He is chair of the National Cancer Research Institute anorectal cancer and CTRad WS2 (UK radiotherapy research) subgroups. He is active in national and international research organisations including IRCI the International Rare Cancer Initiative (for anal cancer) and ARCAD. He has a role within Wales to engage researchers in translational research and leads work package 3 of the Wales Cancer Research Centre. He oversees collaborative translational research in numerous phase II/ III colorectal cancer trials.
Richard Neal <i>England</i>	Richard is Professor of Primary Care Oncology at the Leeds Institute of Health Sciences, Leeds University. Richard’s main research interests are in the diagnosis and management of cancers in general practice. He holds various administrative and representative roles including Chair of the (UK) National Cancer Research Institute (NCRI) Primary Care Clinical Studies Group. He is a founding member of Ca-PRI (the International Cancer and Primary Care Research Network).
Richard Roope <i>England</i>	Richard Roope is a Portfolio GP working in Primary Care and Cancer Management. He trained at Gonville & Caius College, Cambridge and The Royal London Hospital, qualifying in 1987. Following House Jobs, and the GP Training Scheme in Oxford he joined his current practice. He has been a Primary Care Cancer Lead since 2002. In 2011 he became the CSCCN GP Cancer Lead. In April 2014 he took on the role of RCGP and CRUK Clinical Lead for Cancer. Since July 2015 he has been a Senior Clinical Advisor at Cancer Research UK. He is a member of a number of UK Committees, including the UK National Cancer Advisory Group.
Robert Bleehen <i>Wales</i>	Dr Robert Bleehen MA MB BChir MRCP FRCR graduated from University of Cambridge, England and is a Consultant Radiologist in Cardiff, Wales, specialising in colorectal and gynaecological cancer imaging. He supports the SE Wales gynaecological cancer network MDT, South Wales Cancer Network Gynaecological Advisory Group and Wales Gynaecological Cancer National Specialist Advisory Group. He is active in medical politics through his current elected representative roles on BMA Welsh Consultants Committee and BMA Welsh Council.
Rory Harvey <i>England</i>	Rory is the Chair of the East of England Cancer Alliance and provides leadership on cancer issues across the Alliance footprint. In his position he also offers clinical leadership and professional advice to the Network Board and its constituent STPs in the planning, commissioning, development and provision of cancer services to national quality standards. Rory is responsible for leadership of all the sub Boards and Working Groups and for clinical excellence across the Alliance. He is a consultant physician specialising in gastroenterology.
Ross Lawrenson <i>New Zealand</i>	Professor Ross Lawrenson (MBBS London, MD London, FRCGP, FFPH FAFPHM) is Professor of Population Health at the University of Waikato, New Zealand. He has a track record of health services research using GP databases and record linkage. He has also been leading research into health inequalities within New Zealand. His recent research includes studies into prostate and breast cancer. He has been Deputy Chair of the New Zealand Guidelines Group, Chair of the National Screening Advisory Board and is Chair of the Primary Care Working group for the Ministry of Health Prostate Taskforce, a member of the New Zealand Cancer Health Information Strategy Governance Board and a Board member of PHARMAC.
Roy Maxwell <i>Northern Ireland</i>	Consultant Colorectal Surgeon, Belfast Trust.
Scott Fegan <i>Scotland</i>	Scott was a Cancer Research UK Clinical Research Fellow from 2004-2007 and was awarded his PhD by the University of Edinburgh. He is a consultant gynaecological oncologist at the Royal Infirmary of Edinburgh and has been involved in the development of the SIGN Guideline concerning ovarian cancer management, and Quality Performance Indicators for gynaecological cancers for Healthcare Improvement Scotland.
Shahid Rasul <i>Scotland</i>	Nuclear Medicine, NHS Ayrshire & Arran.
Susanna Hill <i>England</i>	Susanna has been a principal in General Practice in North Devon for 29 years. She is a Macmillan GP Advisor for Devon and Cornwall leading the Macmillan Primary care team and is the Acute and Emergency Care Clinical Lead for the South West End of Life Network. She is committed to medical training, working for the University of Exeter Medical School as a Community Sub-Dean in North Devon and Associate Dean for Quality and Assessment at the GP School in ‘Health Education England – working across the South West’.

ICBP Clinical Committees

Tom Crosby <i>Wales</i>	<p>Tom Crosby is Director of Clinical Systems Transformation at Velindre Cancer Centre and Medical Director of the South Wales Cancer Network and specialises upper GI cancer at present. Tom leads in Upper GI Oesophageal Chemo-radiotherapy Research, Service and Development in the UK. As clinical lead for the Wales Cancer Network, Tom has established a clinical advisory structure based on Health Board and site specific clinical leads, written a national MDT Charter and clinically led Peer Review of Cancer Services in Wales. Tom is the cancer clinical lead for the Cancer Implementation Group and Chairs the Information Subgroup and for the Transformation of Cancer Services Programme in South East Wales.</p>
Wendy Anderson <i>Northern Ireland</i>	<p>Wendy Anderson has been a Respiratory Consultant with a clinical interest in Lung Cancer since 2000. She has an active, and published, interest in the use of data to drive change locally, nationally and internationally. She first collected, and presented, comprehensive data on all the lung cancer patients in her trust in 2001, prior to the establishment of LUCADA. She has shared the role of Northern Ireland Lung cancer Lead with Jonathan McAleese since 2013. She is the Divisional Medical Director for Acute and Emergency Medicine in the Northern Health and Social Care Trust. She has historically also published on the subject of Asthma and Allergy.</p>
Winson Cheung <i>Canada</i>	<p>Dr. Winson Cheung is an Associate Professor of Medicine at the University of British Columbia and Staff Medical Oncologist at the British Columbia Cancer Agency in Vancouver, specializing in gastrointestinal malignancies and melanoma. His primary research interest is health services and outcomes research with the aim to ensure appropriate and equitable access to cancer care and to enhance delivery of cancer therapies to all patients. He is also the Chair of the Monitoring and Evaluation Working Group for Colorectal Cancer Screening at the Canadian Partnership Against Cancer where his energy is devoted to the development, validation, and measurement of quality indicators.</p>
Wyn Lewis <i>Wales</i>	<p>Gastrointestinal Surgeon, Lead Clinician & MDT Chair, Cardiff and Vale University Health Board.</p>
