

ICBP Programme Management team – icbp@cancer.org.uk

Lucie Hooper – Senior Programme Manager	
	Lucie is responsible for overseeing and managing all projects within the ICBP. She is the central point of contact for all stakeholders involved in the partnership and has a key interest in raising the profile of and translating findings from the ICBP. She is responsible for the coordination of phase 2, including the delivery of all commissioned work (ICBP SurvMark-2, Module 8 – Health Systems and Module 9 – Cancer Patient Pathways).
Sam Harrison – Senior Manager (Evidence & Research)	
	Sam is responsible for the delivery of the phase 2 in-house research, Module 6 - Access to Diagnostics and Module 7 - Access to Optimal Treatment being carried out by Cancer Research UK. She is also leading on the delivery of Module 5 from ICBP phase 1. She ensures that all partnership activity is robust and evidence-based, from initial research plans to our communications. Sam also works across the Early Diagnosis team.
Irene Reguilon – Research and Communications Engagement Officer	
	Irene is programme managing the final stages of phase 1 (Module 4), as well as working with Sam to deliver the Module 6 - Access to Diagnostics work. Irene has a particular focus on programme communications and engagement with programme board members, researchers and clinicians on behalf of the partnership.
Charles Norell – Research Officer	
	Charlie is working with Sam to deliver Module 7 - Access to Optimal Treatment . He works closely with John Butler, ICBP Clinical Advisor, and the ICBP Clinical Committees to ensure this work reflects current clinical practice and is relevant to each jurisdiction.
Shanta Keshwala – Assistant	
	Shanta is the assistant for the ICBP team. She proactively leads on and has ownership of ICBP logistics and planning providing consistently excellent support to all the partnership's work streams.
John Butler – ICBP Clinical Advisor	
	John provides clinical expertise and advice on the ICBP's research, publications and policy recommendations. He is a gynaecological surgeon at the Royal Marsden NHS Foundation Trust (London) and member of the NCIN clinical reference group and Cancer Research UK Early Diagnosis committee. He is active in research and has published extensively on gynaecological cancer, international cancer survival, and cancer policy.
