

TOGETHER WE CAN HELP BEAT CANCER IN BRECON AND RADNORSHIRE

This data refers to:

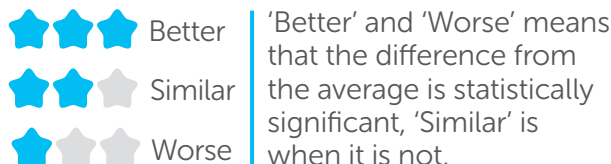

Health Board (HB): Powys Teaching Health Board

We have chosen data most relevant to your constituency.

1 in 2 people will get cancer in their lifetime. Rising referrals and a growing population will increase pressure on cancer services. To achieve world-class outcomes for patients, Government must **tackle preventable risk factors** and **address shortages in the cancer workforce**.

Compared to average:

Together we can prevent more cancers

Around 4 in 10 cancer cases in Wales could be prevented.

Smoking is the largest preventable cause of cancer in Wales.

Overweight and obesity is Wales's second largest preventable cause of cancer. Obese children are around five times more likely to be obese adults.

Smoking

19.2% of adults currently smoke cigarettes in this HB. This is similar to the Wales average (18.7%).

Evidence shows that stop smoking services are the most effective way of helping people to quit smoking.

Childhood obesity

27.4% of 4-5 year-olds are overweight or obese in this HB. This is similar to the Wales average (27.1%).

ACTION: Ask the Public Health Minister to implement a 9pm watershed for junk food marketing.

Together we can diagnose cancer earlier

Bowel screening is one of the best ways to diagnose bowel cancer earlier, but uptake is low. We want 75% of eligible people to take part.

Bowel screening

55.1% of people aged 60-74 take part in bowel cancer screening in this HB. This is higher than the Wales average (53.4%).

ACTION: Ask your HB what they are doing to increase capacity in endoscopy services to prepare for the FIT kit.

Stage at diagnosis

Only **49.0%** of bowel cancers with a known stage are diagnosed early in this HB.

ACTION: Ask your HB what it will do to improve diagnosis at an earlier stage and plan for rising demand in the future.

And meet rising demand

1 in 10 diagnostic posts in Wales are vacant and many more staff will be needed in the future.

Workforce shortages

Workforce shortages in your area may be affecting cancer services. Cancer outcomes cannot improve without the right staff equipped with the right skills.

ACTION: Ask Health Education and Improvement Wales to produce a cancer workforce plan.

TOGETHER WE CAN HELP BEAT CANCER IN BRECON AND RADNORSHIRE

Together we can improve cancer services

Cancer waiting times targets exist to improve patient experience and speed up diagnosis and treatment.

Variation in access to treatment is one reason why cancer outcomes in the UK lag behind other comparable countries.

Referral to treatment

Data is not published for this HB. The Wales average 87.2% is below the national target (95%).

ACTION:

31-day waiting times

Data is not published for this HB. The Wales average 97.3% is below the national target (98%).

ACTION: Ask your local health services what they are doing to maintain swift access to treatment and plan for rising demand in the future.
