Policy for Payment of Consultant Clinician Salaries

1 PURPOSE
This policy sets out Cancer Research UK’s approach to the payment of consultant clinician salaries.

2 SCOPE
This policy covers all Consultant Clinicians whose salaries are supported by Cancer Research UK grants such as personal Fellowships or as Named Research Staff on programme grants. It does not cover Strategic Appointments (see section 3 below) or the salaries of Consultant Clinicians who are Investigators as defined in CRUK’s Policy relating to funding the salaries of Investigators (see section 5.2 below).

3 DEFINITIONS

**Strategic Appointments**: Appointments agreed as part of a Cancer Research UK Centre award, Clinical Trials Unit or specific appointment made relating to a strategic priority area for the Charity.

**Consultant Clinician**: A clinician who has completed their specialist training and is appropriately qualified in a clinical specialism; is practising as an honorary, fixed term or substantive consultant in the UK health services; and is on the Specialist Register. A consultant’s full time working week typically consists of 40 hours split into 10 programmed activities (PA) with two extra/additional programmed activities allowed (APA). Consultant Clinicians outside the UK will be funded in accordance with local mechanisms to support public and charitable funded research. CRUK will consider such arrangements on a case by case basis.

4 POLICY STATEMENT

4.1 Salary Allocation for Fellowships

4.1.1 Cancer Research UK will pay the full salary of clinicians supported through personal fellowships. For Clinician Scientist Fellowships, Advanced Clinician Scientist Fellowships and Senior Cancer Research Fellowships, this may be at the level of a consultant salary.

4.1.2 Any applicant that starts a Clinical Scientist Fellowship or Advanced Clinician Scientist Fellowship prior to obtaining their CCT will receive a salary enhancement for the duration of their fellowship.

4.1.3 Any clinically qualified Senior Cancer Research Fellow will not receive the enhancement.

4.1.4 The salary of a consultant clinician will be based on a contract of 10 programmed activities. Cancer Research UK will additionally meet the costs of one APA for academic work on top of their full time salary; however, funding for the APA must be requested in the application. Any such request must be accompanied by a letter of support from the
Host Institution providing justification for the APA.

4.1.5 If Cancer Research UK is contributing to a proportion of the fellow’s salary, then the maximum number of PAs that this can be based upon is 11. The proportions will be expressed as a number of PAs. Any extra awards or merits on top of their basic salary will not be met by Cancer Research UK.

4.2 **Salary Allocation for all Consultant Clinicians**

4.2.1 Consultant clinicians supported through other funding streams (that is, not on a personal fellowship) will receive a salary determined on a case by case basis.

4.2.2 Cancer Research UK will not meet the costs of NHS merit awards or on-call supplements under any circumstances.

4.2.3 Applications for consultant salaries must include the number of PAs in the full time basic contract. If there are more than 10, Cancer Research UK will require justification to support up to one APA for academic work.

4.2.4 All applications for part-funded posts must be on the basis of number of PAs to be supported, not on a percentage of the full-time salary.
